

A man in a light-colored suit jacket and trousers is walking away from the camera through a white, frame-like sanitizing tunnel. A red suitcase is on a small cart inside the tunnel. In the background, another person is partially visible. The scene is set in a modern, dimly lit environment.

TechnoLine

IT'S SAFE AND EFFECTIVE.

Combat the spread
of COVID-19 with our
innovative sanitizing
tunnels.

Sanitizing Tunnel

PICTURE USED IN THE BROCHURE IS FOR ILLUSTRATIVE PURPOSES ONLY.
ACTUAL PRODUCT MAY VARY FROM WHAT IS SHOWN.

Keep the germs at bay,
Curb the spread of
COVID -19

- Facility to affix any brand of hand sanitizing liquid in front of the tunnel.

UNIQUE FEATURES

UNIQUE BENEFITS

The tank for the liquid has been incorporated under the passage with a drain system

Space saver

Drainage system for the tunnel

This is an important feature because the residue gets accumulated on the ground after multiple sprayings and if not cleared, will not look conducive to enter

There are 24 spray nozzles

Ensures that the liquid covers the maximum surface area exposed for 100% cleanliness.

The pressure pump of 60 bar is used

60 bar pump gives optimum misting capability to spray on the subject in the right recommended way.

Collapsible structure and can be erected during installation

The tunnel can be transported to the customer place easily and for export it saves a lot on freight.

The body of the tunnel is made out of Mild steel

Gives a good finish and look to the product.
