

GLC Series Inline Pump

As energy issues become increasingly prominent, energy saving hasbecome a major consideration in building design and construction.

GLC Inline Pump uses the most advanced CFD technology to develop hydraulic model, with its efficiency much higher than that specified in the national standard GB/T 13007 after actual measure -ment, thereby dramatically lowering operating costs.

Are you still troubled by maintenance issues?

Traditional pump seals leak easily with easily damaged bearings and oil seals, and require time-consuming and laborious maintenance.

GLC Inline Pump uses cartridge single mechanical seals with simple structure, good sealing performance, long service life and easy maintenance.

GLC Inline Pump is free of bearing parts, thereby reducing the number of bearings, oil seals and other wearing parts and greatly lowering maintenance costs. GLC Inline Pump is easy to maintain without the need for removing the pump case and piping series, greatly reducing the maintenance workload. The product is free of bearing parts and easy to install and remove.

Challenge — Small installation space

Limited installation space is a common problem facing the construction of buildings.

GLC Inline Pump is closed coupled pump and free of bearing, which enables smaller overall dimensions and effectively saves installation space.

GLC Series Inline Pump

Scope of Application

HVAC system, hot and cold water circulation, and industrial, agricultural and domestic water supply

Technical Parameters

Operating conditions for: GLC 50-160~150-400

Maximum flow rate: 400m3/h

Maximum head: 160m

Medium temperature: -15°C ~85°C

Operating pressure: 16Bar or 25Bar (The pump

case is made of high-strength materials)
Inlet and outlet diameters: DN50—DN150
Inlet and outlet flanges: designed according to

GB/T17241.6 or any other standards.

Pumping fluid: clean, low-viscosity, non-flammable fluid that does not contain large-volume solid particles or fibers. For other media, please contact your local Xylem distributor.

Mechanical seal: meets ISO3609 and ANSIB73.1 M. Standard Materials include graphite, ceramics and fluororubber. If the medium temperature or the sediment content is high, or if you have any special seal requirements, please contact your local Xylem distributor.

Bill of Materials

Part Name	Materials		
raitivaine	Standard	Optional	
Pump case	HT250	QT450-10	
Pump cover	HT250	QT450-10	
Motor connector	HT250	HT250	
Impeller	SS304	ZCuAl10Fe3	
Shaft	2Cr13	2Cr13	

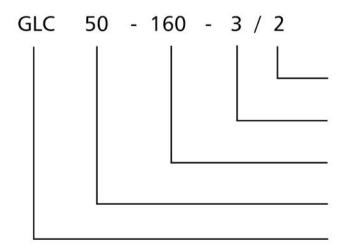

Features

- GLC pump is highly efficient with low NPSHr.
- Compact size, which enables small overall dimensions:

Simple structure and easy maintenance; GLC pump is simple in structure without bearing

- components, easy to install and remove without the need for shaft alignment, and easy to maintain;
- Structural stability, high reliability, and low vibration and noise;
- Good parts interchangeability, few wearing parts, and low maintenance cost.

Main Parameter List of Standard Configuration

Pump	Unit	Series 1	Series 2	Series 3
Inlet and outlet flanges		GB/T17241.6-2008 PN16, adjustable as required		
2. Impeller structure		Single-suction double-seal		
Motor				
Motor mounting method		V1		
4. Motor frequency	Hz	50		
Shaft		: 93		
5. Shaft diameter (Impeller)	mm	25	35	45
Mechanical seal				
6. Mechanical seal materials		Graphite/ceramics/fluororubber		
7. Mechanical seal specifications	mm	32	43	53

Motor pole

e.g. 2=2P

Motor rated power (KW)

e.g. 3=3KW

Impeller nominal diameter (mm)

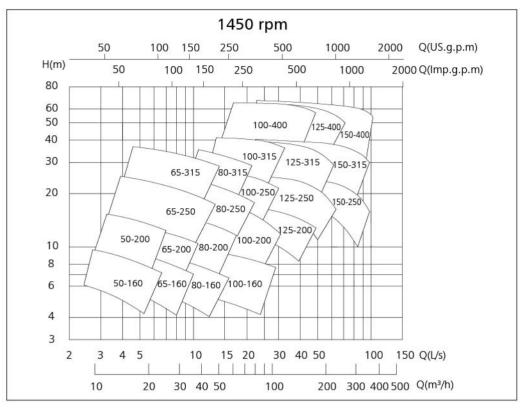

e.g. 160=160mm

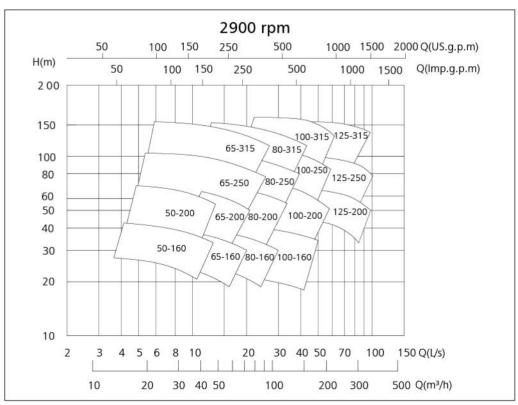

Inlet and outlet diameters (mm)

e.g. 50=DN50

Product series - GLC series

50 Hz Performan Curve

GLC Vertical Double Suction Inline Pump

Technical Parameters

GLC 250x250-375~350x350-400

Operating conditions:

Maximum flow rate: 2100m³/h

Head: 10~46m

Medium temperature: -10°C~+130°C

Operating pressure: 16Bar

Maximum pressure: 24Bar

Efficiency: Max.88%

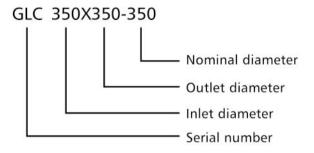

Revolution: 1450rpm

Inlet diameter: DIN250- DIN350

Outlet diameter: DIN250- DIN350

	Materials		
Part Name	Standard	316 stainless steel (custom-made)	
Pump body	HT200	CF - 8M	
Impeller	HT200	CF - 8M	
Motor bracket	HT200	CF - 8M	
Shaft	45	2Cr13	
Orifice sleeve	ZcuZn16Si4	1Cr18Ni9Ti	

Performan Curve

Xylem |'zil m|

- 1) The tissue in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're 16,000 people unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.
